TEXAS A&M
UNIVERSITY

Department of Geology & Geophysics
3115 TAMU, College Station, TX 77843

Research Interests

My general research interest is to explore climate and environmental proxies, understand their underlying mechanisms, and study the co-evolution of environment and ecology in Earth's history. My recent projects focus on the kinetics and atomistic mechanism of carbonate clumped isotope (Δ_{47}) reordering, and applications in basin thermal history and paleoclimate reconstruction based on experiments and physical-chemical modeling. Future research interests include: (1) Mesozoic terrestrial climate; (2) early Ordovician climate and seawater $\delta^{18}\text{O}$; (3) potential applications of organic clumped isotopologues in the reconstruction of paleoclimate and reaction pathways.

Education

2017 — 2024
(Expected)

Ph.D. in Geology

Department of Geology and Geophysics, Texas A&M University

Thesis: Carbonate clumped isotope reordering from atomic approach: heating experiment, kinetic modeling and application.

Advisor: Ethan Grossman

2013 — 2017

B.S. in Geology | *Honor of Outstanding Graduate*

School of Earth Sciences and Engineering, Nanjing University

Thesis: The geochemical features of carbonates from Gaoyuzhuang Formation and Tieling Formation of North China: Implications for the redox conditions of paleo-ocean.

Advisor: Hong-Fei Lin

Professional Experience

2017 — 2020

Graduate Assistantship Research in Clumped Isotope Geochemistry

Department of Geology and Geophysics, Texas A&M University

Advisor: Ethan Grossman

Co-advisor: William Defliese

2016

Research Internship in Geochemistry

The Department of Earth and Planetary Sciences, Yale University

Advisor: Noah Planavsky

Co-advisor: Xiangli Wang

Scholarship, Fellowship & Awards

- [1] **ConcocoPhillips/HEEP Endowed Graduate Fellowship (2022)**
Department of Geology and Geophysics, TAMU
- [2] **Petroleum and Sedimentary Systems Scholarship (2018)**
Berg-Hughes Center, TAMU

Publications (*Denotes equal contribution)

Accepted & Published

- [1] **Sun, Z.***, Perez-Beltran, S.*, Zaheer, W.*, Defliese, W. F., Banerjee, S., and Grossman, E. L.: Clumped isotope reordering kinetics in strontianite and witherite: experiments and first-principles simulations, *Earth and Planetary Science Letters* 624, p. 118467, 2023. doi: 10.1016/j.epsl.2023.118467.

Professional Development Courses

- [1] **CHEM 648 Principles of Quantum Mechanics (Fall 2019)**
Daniel Tabor, Department of Chemistry, TAMU
- [2] **OCNG 641 Inorganic Aquatic Geochemistry (Spring 2019)**
Jessica Fitzsimmons, Department of Oceanography, TAMU
- [3] **GEOL 648 Stable Isotope Geology (Fall 2018)**
Ethan Grossman, Department of Geology and Geophysics, TAMU
- [4] **CHEM 621 Chemical Kinetics (Spring 2018)**
Simon North, Department of Chemistry, TAMU

- [5] **GEOLOGY 658 Earth Systems Through Deep Time: Global Change, Paleoclimate and Life (Spring 2018)**
Ethan Grossman, Department of Geology and Geophysics, TAMU
- [6] **OCNG 689 Cenozoic Paleoclimate (Spring 2018)**
Yige Zhang, Department of Oceanography, TAMU
- [7] **OCNG 655 Experimental Design and Analysis in Oceanography (Fall 2017)**
Henry Potter, Department of Oceanography, TAMU
- [8] **OCNG 640 Chemical Oceanography (Fall 2017)**
Piers Chapman, Department of Oceanography, TAMU
- [9] **GEOLOGY 681 Stable Isotope Methods and Research: Clumped Isotopes (Fall 2017)**
Ethan Grossman, Department of Geology and Geophysics, TAMU

Teaching Experience

Teaching Assistant

- [1] Preparing and organizing class and lab materials, meeting with students to address their questions, guiding students in experimental design and instrument operation, tutoring students in data analysis and visualization with Julia language, and offering support for project presentations.
Course: GEOLOGY 450 Geology Senior Project & GEOS 405 Environmental Geosciences (Spring 2023)
Project: Impact of gas stove usage on indoor air quality and health.
Institution: Texas A&M University
- [2] Preparing the lab session handout, explaining the principle of IRMS and carbonate device for clumped isotope measurement, and training students to perform carbonate clumped isotope analysis.
Course: GEOLOGY 648 Stable Isotope Geology (Spring 2024, Spring 2022 & Fall 2018)
Project: Clumped isotope of modern benthic foraminifera (Spring 2024)
Institution: Texas A&M University

Professional Engagement & Activities

Outreach

- [1] Ions@WORK Mass Spectrometry Symposium (2018)
- [2] Mass Spectrometry for Isotopic Analysis Subunit Open House (2018)
- [3] Chemistry Open House (2018)

Field Trips

- [1] Permian Reef Complex & Guadalupe Mountain, USA (2018)
- [2] Late Ordovician Outcrops, Cincinnati Arch region, USA (2018)

Peer Reviewer

- [1] *Science Advances*, *Chemical Geology* (2024)

Skills

Instrument Technique

Including operation, troubleshooting, maintenance & training

- [1] Thermo Scientific 253Plus IRMS
- [2] Thermo Scientific Kiel IV Carbonate Device with customized PPQ Trap
- [3] Field Emission SEM, CL Microscopy, FTIR Microscopy
- [4] Manual Glass Vacuum Line

Scientific Computation & Programming

Julia, Python, MATLAB
